

Joash Jezreel Lucas Noble

Senior Software Engineer | Full-Stack Developer

Angeles City, Pampanga, Philippines | +63 906 781 9374 | noblejjoash@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Software Engineer and Full-Stack Developer with nearly 10 years of experience building, maintaining, customizing, and improving production business applications. Strong hands-on experience with PHP/Laravel, CodeIgniter, JavaScript, React, Vue, MySQL, REST APIs, and third-party integrations. Experienced in payment, authentication, shipping, notarization, analytics, email, and marketing integrations; performance troubleshooting; legacy-system modernization; client-specific business rules; code review; QA; and production deployments. Comfortable taking ownership of features and working within established systems without requiring a people-management role.

CORE EXPERTISE

PHP / Laravel / CodeIgniter	JavaScript / React / Vue / jQuery / AJAX	MySQL / SQL / REST APIs	Stripe / Auth0 / EasyPost / SendGrid	Third-party API & webhook Integrations
Performance debugging & query optimization	Code review / QA / debugging	Production maintenance / deployments	Client requirements & business rules	WordPress / ACF / Gutenberg

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER / LEAD PROGRAMMER

August 2021 – August 2026

Bycodeworks

- Maintained and enhanced a production traffic-school platform used across California, Florida, Texas, Nevada, and Virginia, supporting online lessons, exams, checkout, payment, and certificate workflows.
- Integrated and maintained third-party services including Stripe, EasyPost, Auth0, BlueNotary, Proof, CleverTap, VWO, SendGrid, Reviews.io, Plaid, Intercom, and other client-required services.
- Implemented a Case Status workflow for admin operations, including active/archive/court views, search, sorting, bulk actions, submission tracking, review status, case statuses, issue tracking, notes, and reactivation.
 - Improved application reliability and performance through N+1 query fixes, checkout refactoring, payment-button protection against duplicate charges, error handling, and Sentry-driven debugging.
- Upgraded the main Laravel application from Laravel 6 to 7 and later 7 to 8; implemented timers, localization, product-tour functionality, and a Python REST API integration for DMV functionality.
- Later progressed into a coordination role for a 3-developer team: assigned development tasks, reviewed pull requests, QA'd implementations, and coordinated releases while remaining hands-on in development.
- Researched and recommended third-party platforms based on functionality and cost, then implemented integrations and verified their end-to-end operation.

MID-LEVEL SOFTWARE ENGINEER

May 2017 – August 2021

JDEV Office Solution Inc.

- Maintained and customized HR, scheduling, payroll, billing, accounting, clinic, and business-management applications for multiple clients using CodeIgniter, jQuery, and MySQL.
- Supported payroll calculations and regulatory updates involving SSS, Pag-IBIG, PhilHealth, withholding tax, loans, leaves, and client-specific reporting requirements.
- Maintained systems deployed on cloud servers and delivered client-specific modules, reports, fixes, exports, and workflow improvements.

- Developed a Business Management System from the existing accounting platform, adding Bill of Materials, receiving, invoicing, Job Orders, and Variation Orders.

DATABASE EDITOR — INTERN

November 2016 – March 2017

Top Data Global IT Solutions

- Maintained and improved database records through data entry, validation, organization, and correction of inconsistencies

SELECTED PROJECTS

Traffic School Platform | Laravel, JavaScript, jQuery, AJAX, MySQL, Stripe, Auth0, EasyPost

Production business application for online lessons, exams, payments, certificates, and state-specific workflows. Contributed major features, integrations, performance fixes, Laravel upgrades, localization, and admin workflows.

Client Drive System | React, Laravel, Tailwind, Stripe, Spatie Permission

Collaboration platform for tasks, comments, attachments, deadlines, teams, invitations, permissions, and project activity. Contributed feature development, reskinning, Stripe integration, invitation workflows, inactive-team handling, and QA.

Church & Enrollment System | Laravel, jQuery, Tailwind CSS

Built from start to finish as a custom system with member, mission, giving, income/expense, reporting, and enrollment workspaces. Enrollment covered subjects, curricula, classes, students, teachers, schedules, grades, and enrollments.

HR, Scheduling & Payroll Systems | CodeIgniter, jQuery, MySQL, Bootstrap

Maintained established client systems covering employee scheduling, barcode-based timekeeping, payroll, statutory deductions, leaves, documentation, and client-specific reporting. Also created a simplified payroll workflow.

Business Management System | CodeIgniter, jQuery, MySQL, Bootstrap

Extended a standard accounting system into a broader business-management application with Bill of Materials, receiving, invoicing, Job Orders, and Variation Orders.

EDUCATION & RECOGNITION

City College of Angeles

2013-2017

Bachelor of Science in Information Systems (BSIS)

- Participated in back-end programming, TORO Competition (2016)
- Dean's Lister, 2nd Semester, S.Y. 2016–2017

TECHNICAL SKILLS

Languages: PHP, JavaScript, SQL

Backend: Laravel, CodeIgniter, REST APIs

Frontend: React, Vue, jQuery, AJAX, HTML, CSS, Bootstrap, Tailwind CSS

Database: MySQL

CMS: WordPress, ACF, Gutenberg

Tools: Git, Sentry, Trello, Figma, Adobe Photoshop
