

Joash Jezreel Lucas Noble

Senior Software Engineer | Full-Stack Developer

Angeles City, Pampanga, Philippines | +63 906 781 9374 | noblejjoash@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Software Engineer with nearly 10 years building and maintaining production business applications. I work mainly in PHP/Laravel and CodeIgniter on the backend, with React and Vue on the front end, MySQL for data, and REST APIs to tie systems together. Over the years I've integrated payment gateways, auth providers, shipping and notarization services, analytics, email, and marketing tools into existing platforms, usually while also chasing down performance issues, modernizing legacy code, and adapting things to fit each client's specific business rules.

CORE EXPERTISE

PHP / Laravel / CodeIgniter	JavaScript / React / Vue / jQuery / AJAX	MySQL / SQL / REST APIs	Stripe / Auth0 / EasyPost / SendGrid	Third-party API & webhook Integrations
Performance debugging & query optimization	Code review / QA / debugging	Production maintenance / deployments	Client requirements & business rules	WordPress / ACF / Gutenberg

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER / LEAD PROGRAMMER

August 2021 – August 2026

Bycodeworks

- Maintained and enhanced a production traffic-school platform serving California, Florida, Texas, Nevada, and Virginia, supporting online lessons, exams, checkout, payments, and court-use certificate workflows.
- Joined as a Senior Software Engineer and later progressed into a Lead Programmer role; remained hands-on while assigning work, reviewing pull requests, QAing implementations, and coordinating releases for a 3-developer team.
- Implemented major platform features including Case Status workflows, state-specific functionality, lesson timers, localization, product tours, checkout improvements, and DMV functionality through a Python REST API.
- Improved reliability and performance through fixes, checkout refactoring, duplicate-payment protection, validation/error handling, and Sentry-driven production debugging.
- Led the incremental upgrade of the main Laravel application from version 6 through 10, resolving compatibility issues and ensuring existing production workflows remained stable throughout each major-version migration.
- Integrated and maintained third-party services including Stripe, EasyPost, Auth0, BlueNotary, Proof, VWO, CleverTap, SendGrid, Reviews.io, Plaid, and Intercom; researched vendors and recommended solutions based on functionality and cost.
- Contributed to additional products including a co-parenting education/certification platform, a React/Laravel client collaboration system, WordPress marketing applications, and a church/enrollment system.

MID-LEVEL SOFTWARE ENGINEER

May 2017 – August 2021

JDEV Office Solution Inc.

- Maintained and customized client-facing HR, scheduling, payroll, billing, accounting, clinic, and business-management applications using CodeIgniter, jQuery, and MySQL.
- Took over established systems when original developers left, continuing development, maintenance, troubleshooting, and client-specific enhancements.
- Implemented scheduling and barcode-based timekeeping connected to payroll, including SSS, PhilHealth, Pag-IBIG, withholding tax, loans, and leave calculations.

- Created a Business Management System by extending the standard accounting platform with Bill of Materials, receiving, invoicing, Job Orders, and Variation Orders.
- Delivered client-specific reports, exports, workflow changes, and fixes across multiple production systems.

DATABASE EDITOR — INTERN

November 2016 – March 2017

Top Data Global IT Solutions

- Maintained and improved database records through data entry, validation, organization, and correction of inconsistencies.

SELECTED PROJECTS

Traffic School Platform — *Laravel, JavaScript, jQuery, AJAX, MySQL, Stripe, Auth0, EasyPost*

Production platform for online lessons, exams, payments, certificates, and state-specific workflows. Contributed major features, integrations, performance fixes, Laravel upgrades, localization, and admin workflows.

Client Drive System — *React, Laravel, Tailwind, Stripe, Spatie Permission*

Collaboration platform for tasks, comments, attachments, deadlines, teams, invitations, permissions, and project activity. Contributed development, reskinning, Stripe integration, invitation workflows, inactive-team handling, and QA.

Church & Enrollment System — *Laravel, jQuery, Tailwind CSS*

Built from start to finish with member, mission, giving, income/expense, reporting, and enrollment workspaces covering subjects, curricula, classes, students, teachers, schedules, grades, and enrollments.

HR, Scheduling & Payroll Systems — *CodeIgniter, jQuery, MySQL, Bootstrap*

Maintained established client systems covering scheduling, barcode timekeeping, payroll, statutory deductions, leaves, documentation, and client-specific reporting; also created a simplified payroll workflow.

Business Management System — *CodeIgniter, jQuery, MySQL, Bootstrap*

Created by extending a standard accounting system with Bill of Materials, receiving, invoicing, Job Orders, and Variation Orders.

EDUCATION & RECOGNITION

City College of Angeles

2013-2017

Bachelor of Science in Information Systems (BSIS)

- Participated in back-end programming, TORO Competition (2016)
- Dean's Lister, 2nd Semester, S.Y. 2016–2017

TECHNICAL SKILLS

Languages: PHP, JavaScript, SQL

Backend: Laravel, CodeIgniter, REST APIs

Frontend: React, Vue, jQuery, AJAX, HTML, CSS, Bootstrap, Tailwind CSS

Database: MySQL

CMS: WordPress, ACF, Gutenberg

Tools: Git, Sentry, Trello, Figma, Adobe Photoshop
