

Joash Jezreel Lucas Noble

Senior Software Engineer | Full-Stack Developer

Angeles City, Pampanga, Philippines | +63 906 781 9374 | noblejjoash@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer and Full-Stack Developer with 9+ years of experience building and maintaining production web applications. Core expertise in PHP, Laravel, React and MySQL, with experience building different types of applications and integrating third party services. Experienced in managing small development teams, solving complex technical problems, and delivering reliable solutions that help clients and businesses achieve their goals. Passionate about learning new technologies and continuously improving my skills.

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER / LEAD PROGRAMMER

August 2021 – August 2026

Bycodeworks

- Joined the development team for an existing production Traffic School platform and contributed to its continued development and maintenance using Laravel, JavaScript, and MySQL, supporting users across California, Florida, Texas, Nevada, and Virginia.
- After approximately two years, progressed into the Lead Programmer role for the Traffic School project, managing a small team through task assignment, code reviews, mentoring, troubleshooting, and deployments.
- Developed and maintained features including lessons, exams, certificates, case management, payments, localization, and administrative functionality.
- Integrated and maintained third-party services including Stripe, Auth0, BlueNotary, EasyPost, SendGrid, Plaid, Sentry, CleverTap, and Intercom.
- Refactored the existing Stripe PaymentIntents workflow to integrate Stripe Products and Prices, improving payment logic and maintainability, while also contributing to the payment functionality of a separate React and Laravel collaboration system.
- Investigated and resolved production issues using Sentry, debugging, and staging environments, identifying root causes and implementing fixes to maintain system reliability.
- Contributed to the application's upgrade path from Laravel 6 through Laravel 10, helping modernize and maintain the existing production codebase.
- Built a separate Church and Enrollment System from scratch using Laravel, Tailwind CSS, and MySQL, developing the application's initial structure and core functionality before the project was discontinued.

Key Projects

- **Traffic School Platform** - Laravel, JavaScript, jQuery, AJAX, MySQL, Stripe, Auth0, EasyPost. Production platform for online lessons, exams, payments, certificates, and state-specific workflows. Contributed major features, integrations, performance fixes, Laravel upgrades, localization, and admin workflows.
- **Client Drive System** - React, Laravel, Tailwind CSS, Stripe. Collaboration platform for tasks, comments, attachments, deadlines, teams, invitations, permissions, and project activity. Contributed development, reskinning, Stripe integration for payment gateway, invitation workflows, inactive-team handling, and QA.
- **Church & Enrollment System** - Laravel, jQuery, Tailwind CSS. Built from start to finish with member, mission, giving, income/expense, reporting, and enrollment workspaces covering subjects, curricula, classes, students, teachers, schedules, grades, and enrollments.

MID-LEVEL SOFTWARE ENGINEER

May 2017 – August 2021

JDEV Office Solution Inc.

- Continued the development and maintenance of existing HR, scheduling, attendance, and payroll systems for multiple clients using PHP, CodeIgniter, MySQL, JavaScript, jQuery, and AJAX, while implementing new features and improvements.
- Implemented and updated payroll-related features and business rules covering SSS, Pag-IBIG, PhilHealth, withholding tax, loans, and leaves based on client requirements and changes to Philippine statutory regulations.
- Developed client-specific reports, system customizations, and business rules to support different business processes and requirements.
- Maintained and enhanced existing clinic management, billing, and business management systems, implementing new functionality and addressing system issues.

Key Projects

- **HR, Scheduling & Payroll Systems** - CodeIgniter, jQuery, MySQL, Bootstrap. Maintained established client systems covering scheduling, barcode timekeeping, payroll, statutory deductions, leaves, documentation, and client-specific reporting, also created a simplified payroll workflow.
- **Accounting and Business Management System** - CodeIgniter, jQuery, MySQL, Bootstrap. Created by extending a standard accounting system with Bill of Materials, receiving, invoicing, Job Orders, and Variation Orders.

DATABASE EDITOR - INTERN

November 2016 – March 2017

Top Data Global IT Solutions

- Maintained and improved database records through data entry, validation, organization, and correction of inconsistencies.

EDUCATION & RECOGNITION

City College of Angeles

2013-2017

Bachelor of Science in Information Systems (BSIS)

- Participated in back-end programming, TORO Competition (2016)
- Dean's Lister, 2nd Semester, S.Y. 2016–2017

TECHNICAL SKILLS

Languages: PHP, JavaScript, SQL

Backend: Laravel, CodeIgniter, REST APIs

Frontend: React, Vue, jQuery, AJAX, HTML, CSS, Bootstrap, Tailwind CSS

Database: MySQL

CMS: WordPress, ACF, Gutenberg

Tools: Git, Sentry, Trello, Figma, Adobe Photoshop

Deployment / Server Management: DigitalOcean, FileZilla
